Earphone Charging Indication

(1) Understand the earphone's power

You can check the current power of the ear hook on your mobile phone. When the power is lower than 20%, the ear hook will emit a prompt tone and the red indicator will flash. When the power is lower than 10%, the ear hook will automatically shut down.

(2) Earphone charging

After the ear-hook is put into the charging case and turn off the charging case cover, the ear-hook is turned off for charging.

When the battery is completely low, the bluetooth ear-hook will be fully charged in about 2 hour.

The Charging Cabin's Charge Indication

BTC:bc1qlyj59py46qtk3g9nzgegug
w0ht6jqx44v8gpfz

(1) Understanding of the electric quantity of the charging cabin

 When putting the earhook into the charging case, or opening/closing the charging case cover, the LED light in the case flashes slowly three times and goes out, indicating the current battery level of the charging case.

- Red light: 0-30% power
- Yellow light: 30-70% power
- Green light: 70-100% power

(2) Charging of charging cabin

Plug in the charging line to charge the charging cabin. Unplug the charging cable and the indicator light goes out.

- Charging: LED red light in the cabin is always on.
- Fully charged: the LED green light in the cabin is always on.

Charging Considerations

- ① In order to ensure the service life and safety of the equipment, do not use the fast charger to charge.
- ② The charger certified by the regular manufacturer must be selected.
- ③ Repeated charging and discharging will lead to the decrease of battery efficiency as time passes.

Single Ear Using Instruction

Can switch to left and right earphone freely

- ① Take out any earphone, the earphone will automatically connect back to the last connected device, and it can be used as a single ear,
 - ② The ear-hook prompts that the connection is successful, and can play music and voice calls.
 - ③ If you need to use both ears at this time, please take the other side of the earphone from the charging compartment to start using the ear
- * Note: The earhook has been connected to the mobile phone, put any stand-alone device into the charging case and shut down, and the other stand-alone device keeps working in the original mode; when the earhook is taken out again, it will automatically return to the host.

Clearing Of Earphone Pairing Information

BTC:bc1qlyj59py46qtk3g9nzgegug
w0ht6jqx44v8gpzfz

Clearing earphone pairing information
can solve problems such as unsuccessful
connection of most earphones.

- ① Put back earbuds into charging case
- ② Long press the left and right multi-function button together for 10 seconds,
and the green light flashes three times, then the ear hooks are reset
successfully.

Safety

- ① Do not disassemble or modify the earphones for any reason, or the earphones may break
down or burn out;
- ② Do not touch the equipment with liquid, oil or other volatile liquid, or it may cause serious
damage to the equipment;
- ③ Beware of sharp edges, uneven metal surfaces, metal parts, fittings and packaging to avoid any
possible damage;
- ④ Do not use the equipment in the environment temperature too low or too high (below -5°C or
 45°C above);
- ⑤ Please avoid using the device indicator light close to the eyes of children or animals;
- ⑥ Do not use the equipment in thunderstorms, which may lead to abnormal operation of the
equipment and increase the risk of electric shock
- ⑦ Please do not use this product in dangerous places.

Product Problem Solutions

Problems	Solution
Does only one ear have the sound when using both ears?	It is recommended to clear the Bluetooth pairing information and reconnect because the pair of earphones was not paired successfully
Can mobile phone (other devices) not find Bluetooth?	Please put the earphone back on the charging hatch cover and take it out from the hatch cover again, close the device Bluetooth and reconnect.
Can earphones not be turned on or off automatically?	The earphone has not enough power Please charge them in time.
Are earphones disconnected?	When the earphone is out of range, it will be disconnected and automatically reconnected within 3 minutes if return to the scope of Bluetooth.
Does the Earphone fail to auto-reconnect?	Make sure your phone is in Bluetooth mode, or it will not be able to automatically reconnected.
Is there no sound after connection?	Connection is not successful, please reconnect.
Can the earphones not be charged?	The earphones are not placed correctly, please re-posit the charging cabin.
Is there a noise on the phone?	Change the conversation environment or bring the earphone closer to the device.
Is the earphone signal intermittent?	Place the phone on the same side of the earphone and let away from outside interference signals.
Is the connection to the computer not successful?	Please verify that whether your computer has Bluetooth functionality or not, if not, you can install a Bluetooth adapter with a USB interface by yourself.
Unable to use AAC transmission	IOS supports AAC transmission mode by default, and devices with Android system need to be upgraded to Android 10 or above.
